TACTICAL Rehabilitation®

A Heart for Serving Others

★IMPORTANT MESSAGE★

Depending on product specific availability and needs of the patient, an alternative comparable product could be provided to the patient that is listed in our Alternative/Comparable Products list.

Any deviation from the original specific vendor or product name in the referral, is determined by a certified, experienced team member, to treat the diagnosis given by the provider and not deviate from the specific type or HCPCS code indicated by the provider in the referral.

Alternate products can be replaced at the request of the provider or patient if concerns arise.

***If a provider does not wish to allow any deviations it can be documented in the referral "no deviations" or they can choose not to add "or**

PROVEN PROCESS

Your doctor provides a prescription.

Our care specialist contacts you to schedule an appointment.

Our Board Certified Orthopedic Professional will take care of you during your office visit.

We will fill your order.

Our special care process will be sure you are called or text messaged to notify you of product delivery within seven days.

Drop by to pick up your order and ask any questions.

Tactical Rehabilitation is a full service DME company whose mission is to serve those who serve our country.

"We provide the highest quality products and the highest level of service to all our patients. Our goal is to provide this service through highly trained employees with a heart for serving others."

All of our products are battle tested, having been used by service members deployed throughout the world. Our office staff is trained to provide the highest quality care and fit for patients and to be a resource for providers.

SOLE SUPPORTS
WE MAKE PEOPLE BETTER

WHY USE SOLE SUPPORTS?

Utilizing MASS Posture Theory, the Sole Support provides a full contact, truly custom fit, tailored for each patient to oppose forces that lead to pathology.

Each shell is 100% custom molded, using no prefabricated approximations. The heel cup provides a substantial 10mm of height, to properly distribute forces to the medial and lateral arches.

The Sole Support is also compatible with a wide array of customization options, such as the ones shown below (please put any customization options in the notes section of your order).

1. Full contact, custom medial arch support

2. Full contact, custom lateral arch support

THE LEAF™

These insole add-ons are designed to add extra support to your orthotic according to your activity requirements.

FULL FOOT LIFTS

These peel and stick add-ons allow you to incrementally add an even modification to the entire orthotic.

MET PADS

Met pads achieve saggital plane realignment, which relieves 2nd, 3rd, and/or 4th metatarsophalangeal joint soft-tissue compression.

Sole Supports™ are custom fit orthotics designed and manufactured in the USA using custom molds and 3D imaging technology. They are the only orthotics that are truly calibrated to your weight, forefoot flexibility and activity level using MASS Posture Theory, making it the most effective product on the market.

Indications

- Plantar Fasciitis
- Foot deformities
- Hallux Limitus
- Metatarsalgia
- Morton's Neuroma
- Metatarsal fracture
- Bunions
- Gait Abnormality
- Flat feet
- Pronation
- Low arch

** All orders for Sole Supports custom orthotics must have a main or additional diagnosis related directly to the foot. Include justification/medical necessity in the notes of the referral.*

*** Please put any customization (i.e. met pad, heel lift) request for orders in the referral notes.*

Ordering Info for DME Consult

This is This is an order for Sole Supports Custom Orthotics Berkeley Shell type L3000-4 items, one pair for Garrison (regular duty) and an additional pair for Field/Deployment (heavy duty with leaf's) from Tactical Rehabilitation INC (Fed Tax ID 46-2082171).

*** Each new set after the initial set requires an explanation of justification for the need for replacement, which must be documented in the referral. This includes explanation of need with Diagnosis changes.

★TRI-WAVE TENS COMBO UNIT★

Multifunction electrotherapy offering patients 3 modalities in 1 highly customizable & user-friendly, ergonomic design.

- **Transcutaneous Electrical Nerve Stimulation (TENS) mode has frequencies to reach recurring and chronic pains. Stimulates sensory nerves for therapeutic purposes, suppressing pain signals sent to the brain from the site of pain. Used to provide non-invasive pain management for symptomatic chronic & acute conditions.**
- **Interferential Stimulation (IFC) mode is an anti-inflammatory based treatment used to increase circulation & gain deeper penetration of tissue. Stimulates the muscle motor nerves using high frequency transmission to block nerve receptors at spinal level, increases blood flow and ROM without movement of the body part. Used for symptomatic relief and chronic intractable pain.**
- **Neuromuscular Electrical Stimulation (NMES) mode provides muscular training for localized regeneration and muscular hypertrophy. Uses rehab & strength style training to promote muscle fiber contractions at varied frequencies to prevent fatigue. Commonly used for neuromuscular pain, spasticity, nerve/tissue damage and post-op muscle weakness.**

*Choose one order below & include the diagnosis with medical necessity in your consult.

Ordering Info for DME Consult:

This is an order for a TENS/IFC Combo unit for lifetime use Code E0730-1 (for 99 months), Garment Code E0731-1, Year Supply Electrodes Code A4556-72, Lead Wires Code A4557-2, Conductive Gel Code A4558-6 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

Indications

- **Acute/Chronic Pain**
- **Edema**

★TENS-CONDUCTIVE GARMENTS & SUPPLIES★

IMPORTANT COVERAGE UPDATE

PLEASE KNOW THAT TRICARE NO LONGER COVERS ANY TENS UNIT OR SUPPLIES FOR UNSPECIFIED DIAGNOSES OR DIAGNOSES OF LOW BACK PAIN, TMJ PAIN OR HEADACHES. PLEASE SEE TRICARE MANUAL FOR ADDITIONAL DETAILS ON UPDATE.

Conductive Garments are used with TENS units. Electrotherapy can be easily applied to hard to reach spots on the body with incredible accuracy. This unique conductive mesh material can stimulate large areas or multiple areas of the body. Garments provide comfort and efficient dispersion of TENS current and stimulation across the entire extremity.

Multi-purpose Garment

***PLEASE SPECIFY IN THE REFERRAL WHAT BODY PART THIS GARMENT IS INTENDED FOR.**

Hand/Wrist

Arm & Leg

Foot/Ankle

Ordering Info for DME Consult:

This is an order for a Garment, Code E0731-1 (for 99 months), as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

***For multiple garments: Include appropriate quantity & diagnosis for each garment body part, along with clinical notes justifying the medical necessity.
Fax number to send clinical notes is below.**

★SAM PRO 2.0★

Sam® Pro is a sustained acoustic medicine product offering single rapid charge, touch control, enhanced coupling patches, and rugged housing.

The device is designed for patients with arthritis and chronic injuries. This product is easy to use, safe, and effective. Sam® Pro is approved by the US FDA. It is clinically proven to reduce pain and improve function. It has helped 24 million US Veterans and active duty service members.

Ordering Info for DME Consult:

This is an order for a Sam Pro 2.0 E1399-6 as listed from Tactical Rehabilitation INC (Fed Tax ID 46-2082171) including one unit E1399-1 and 5 packs of patches E1399-5. Long Duration Ultrasound Device is intended for home use to apply ultrasonic energy to generate deep heat within body tissues for the treatment of selected medical conditions such as the relief of pain, the relief of muscle spasms, the treatment of joint contractures, and the local increase in circulation. This product(s) (SamPro2.0 item# SA271KT & Gel patches item# UB1424) has been approved as substantially equivalent by the FDA under 510(K) Number K191568.

Information to be dictated in each patient's medical notes:

I am prescribing the SAM® 2.0 wearable-active multi-hour Low Intensity ultrasound device (up to 4-hours per day) to reduce pain and accelerate musculoskeletal healing for this patient. This device is prescribed to control pain and to reduce/eliminate the need for prescription pain medication including opioids.

SAM® 2.0 is not a traditional Therapeutic Ultrasound which is only used for 5-8 minutes in a clinic which does not accelerate healing or reduce pain.

SAM® 2.0 should be used for up to 4-hours per day for up to 60-days and is clinically proven to accelerate collagen lay down, increase oxygenated hemoglobin in the muscles, accelerate angiogenesis effect for capillary development, and to increase local blood flow. The SAM® device may be used at home or at work.

Commonly qualified Dx used for referral:

Diagnosis similar/related, but not limited to, most/all tendonitis, bursitis, muscle tears, biceps impingement, SI dysfunction, facet syndrome, and osteoarthritis of all joints, etc.

NOT COVERED:

*Generic Dx codes only showing symptom, i.e. General & Low Back Pain.
Dx must show specific, underlying condition.*

★ CMF OL1000 BONE GROWTH STIMULATOR ★

CMF OL1000™ Bone Growth Stimulators are portable, battery-powered medical devices indicated for use in the noninvasive treatment of an established nonunion fracture acquired secondary to trauma, excluding all vertebrae and flat bones. The device was designed with the following features: Lightweight and comfortable, Easy-to-use & Noninvasive, Requires simple, one-button operation, Device is worn for 30 minutes per day, Can be used with internal or external fixation or over a cast. The CMF signal continuously operates within frequencies optimal to heal bone. This potent signal allows for a single 30-minute per day treatment and is specifically targeted to the osteoblast cell. This signal targets the endogenous production of IGF-II, a key growth factor in the formation of bone. GF-II protein is recruited through calcium ion channels and receptors on the cell membrane. The resulting increase in IGF-II growth factor helps promote cell division. CMF was specifically designed for a once daily treatment to best mimic cell replication. As the cells continue to divide and regular treatment progresses, the body is able to heal.

Ordering Info for DME Consult:

This is an order for a DonJoy CMF OL1000 E0747-1 Bone Growth Stimulator as listed from Tactical Rehabilitation INC (Fed Tax ID 46-2082171)

*Needs CMN for billing (Tricare may request in order to secure auth).

Indications:

- Diagnosis for either the specific fracture site or the non union for the specific fracture site.
- Fractures greater than 14 days showing nonunion and no progressive signs of healing
- Fracture gap required
- Follows FDA Guidelines (No joint fusion coverage)

Contraindications:

- Use of this device is contraindicated in individuals having a synovial pseudarthrosis.
- Demand-type pacemaker or implantable cardioverter defibrillator (ICD) operation may be adversely affected by exposure to magnetic fields. Physicians should not prescribe CMF™ OL1000™ for applications that may place the treatment transducers in close proximity to the pacemaker.

★CMF SPINALOGIC BONE GROWTH STIMULATOR★

CMF SpinaLogic is a portable, battery-powered, micro-controlled, noninvasive bone growth stimulator indicated as an adjunct electromagnetic treatment to primary lumbar spinal fusion surgery for one or two levels. Designed to be a lightweight device with cushion strap designed for maximum patient comfort. Can be applied over a cast, brace, or clothing. DJO's more advanced technology to support patient use and one button technology for ease of use.

Ordering Info for DME Consult:

This is an order for a DonJoy CMF Spinalogic E0748-1 Bone Growth Stimulator as listed from Tactical Rehabilitation INC (Fed Tax ID 46-2082171)

***Needs CMN for billing (Tricare may request in order to secure auth).**

****Criteria for Coverage: non-union fracture with no progression of healing**

Indications:

- Lumbar only coverage
- Adjunct to Primary lumbar spinal fusion - single or multi-level L1,L2,L3,L4,L5
- Single level fusion w/ Risk factors
 - Current Tobacco use
 - Diabetes
 - Obesity
 - Steroid use
 - Grade 2 or higher spondy
 - Renal disease
 - Severe Anemia
- Follows FDA Guidelines

***After surgery with no specific time frame identified
(No revision fusion, No failed spinal fusion coverage)**

Contraindications:

- Demand-type pacemaker and implantable cardioverter defibrillator (ICD) operation may be adversely affected by exposure to combined static and dynamic magnetic fields. Physicians should not prescribe CMF™ SPINALOGIC® for patients with such devices.
- The safety and effectiveness of CMF™SPINALOGIC® in pregnant women have not been studied, and the effects of the device on the mother or the developing fetus are unknown. Thus, this device should not be used in pregnant women. If a woman becomes pregnant during treatment with CMF™ SPINALOGIC®, treatment should

ASPEN HORIZON™ LSO

Designed to provide trunk stability to fatigued muscles which can lead to acute and chronic low back pain. Provides a therapeutic level of compression for patients recovering from surgery or injury. Its low profile design can be comfortably worn underneath clothing.

Indications

- Osteoarthritis
- Spondylolysis
- Spinal Stenosis

Ordering Info for DME Consult:

This is an order for a Horizon L0650-1 LSO as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

ASPEN HORIZON™ TLSO

Designed to provide motion restriction, creating a dynamic environment for healing within the thoracolumbar and lumbar spine. Comfortable to wear and easy to don and doff. Designed specifically to target patients with challenging indications such as compression fractures, burst fractures and hyper-kyphosis.

Indications

- Postural Issues
- Kyphosis
- Compression Fractures
- Low-Mid Sprains/Strains
- Post-Op

Ordering Info for DME Consult:

This is an order for a Horizon L0457-1 TLSO as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

ASPEN ACTIVE™ P-TLSO

Designed to address the symptoms associated with poor posture often due to prolonged use of electronic devices/technology. While actively influencing a patient's posture, the brace provides gentle support while activating postural stabilizing muscles. This product helps train the body to hold neutral posture by concurrently stretching and strengthening the structures that have become tight and deconditioned over time due to poor posture.

Indications

- Kyphosis
- Abnormal Posture
- Spinal Alignment

Ordering Info for DME Consult:

This is an order for a Horizon L0457-1 P-TLSO as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

ASPEN Sierra Hyperextension TLSO

Height and width adjustable with tightening control to provide patients with a personalized environment for healing. This TLSO supports from a wide variety of pre- and post-operative spine conditions such as compression fractures due to osteoporosis and trauma. Designed with comfort in mind, the brace's streamlined design and pivoting pelvic bar accommodate movement for effortless all-day wear.

Indications

- Post-Operative Support
- Degenerative Disc Disease
- Kyphosis
- Spondylosis
- Fracture Management
- Bulging/Herniated Disc,

Ordering Info for DME Consult:

This is an order for a Hyperextension TLSO L0472-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DDS 500 LUMBAR TRACTION

A unique and patented spinal air traction design that is thin, lightweight and easy to use. Offers a high degree of mobility, alleviating and preventing back pain. It can be discreetly worn under clothing allowing you to perform daily activities enabling an active lifestyle. The patented VAP Technology decreases axial loading while increasing intervertebral disc space by anchoring underneath the rib cage pushing upwards and against the pelvic girdle pushing downwards. This action gently stretches the torso vertically and displaces stress away from the affected disc and nerve. Pressure and pain levels, within the lumbar spine region are significantly reduced which can assist active rehabilitation.

Indications

- Herniated/Bulging Discs
- Lumbar Acute/Chronic Sprain
- Spondylolysis and Spondylolisthesis
- Compression Fracture in the Lumbar Region
- Failed Surgery Syndrome
- Degenerative Disc Disease
- Congenital Weakness in Waist
- Spinal Stenosis

Ordering Info for DME Consult

This is an order for a DDS 500 Ambulatory Lumbar Traction L0648-1 LSO as listed from Tactical Rehabilitation INC (Fed Tax ID 46-208171)

VISTA® MULTIPOST THERAPY COLLAR

Designed to reduce symptoms associated with cervical conditions such as cervicogenic headaches, Forward Head Carriage and “Text Neck”. Unnatural head positions can shift the cervical spine out of alignment, leading to radiculopathy, neuropathy and cervicogenic pain. Promotes an enhanced environment for healing by combining a pneumatic compression bladder that helps achieve cervical neutral with hot or cold therapy intended to reduce inflammation and muscle spasm.

Indications

- Spondylolysis
- Spinal Stenosis
- Compression Fracture

Ordering Info for DME Consult:

This is an order for a VISTA Multipost Therapy Collar or Alternative/Comparable Collar L0180-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY VERSAROM HIP BRACE

The low-profile, DonJoy® VersaROM® Hip helps deliver effective, functional ROM restriction in 15° increments. Easy-to-use abduction/adduction push buttons and malleable hip and thigh shells help provide an individualized fit for increased patient comfort and compliance. The adjustable compression belt with easy-grip pull tabs anchors the hip joint, and the padded thigh cuff increases optimal alignment. With a universal fit, one brace fits right or left hip up to a 54” waist circumference.

***Provider Note:** Referral notes should indicate degrees of ROM desired to be set during the fitting appointment.

Indications

- Post Op
- Hip Instability
- Stable Hip Fractures
- ROM Control
- Muscular Imbalance
- Patients at Risk to Dislocate

Ordering Info for DME Consult:

This is an order for a DJO Versarom Hip Brace or Alternative/Comparable Hip Brace L1686-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

CORFLEX PNEUMATIC SHOULDER

Shoulder wrap designed to combine the benefits of pneumatic compression with therapy from gel patches; features pump bulb that detaches once desired compression is achieved. Manufactured from plush foam laminate with contact closure straps, removable gel pack with tricot lining and non-toxic gel; additional universal extension straps available.

Indications

- Post-Op
- AC Joint Separations
- Bursitis
- Sports Injuries
- Swelling/Edema
- Muscle Spasms

Ordering Info for DME Consult:

This is an order for a Corflex Pneumatic Shoulder or Alternative/Comparable Shoulder Brace L3670 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY® ULTRASLING QUADRANT SHOULDER

A shoulder orthosis that provides four angles of immobilization in one brace for optimal versatility and inventory reduction. The unique ProTherapy™ precision-based system enhances the rehab process and provides a single-handed, patient friendly application while the cool-to-touch, anti-microbial TempGuard™ material adds extraordinary comfort.

Indications

- Post-Op Immobilization
- Protocols Involving Stabilization Following Fractures to the Proximal Humerus, Elbow, and Forearm, Shoulder Dislo-

***Provider Note: Referral notes should include the desired degree of abduction and/or internal/external rotation to be set during the fitting**

Ordering Info for DME Consult:

This is an order for a DJO UltraSling Quadrant Shoulder or Alternative/Comparable Shoulder Brace L3960-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

OMO NEUREXA SHOULDER

The Omo Neurexa Plus shoulder orthosis is used to aid the rehabilitation of patients suffering from shoulder pain and dysfunction after stroke or injury to the central or peripheral nervous system. Facilitates active rehabilitation by correctly positioning the arm and promoting movement. The orthosis can now be applied by patients themselves with one hand.

Indications

- **Shoulder Pain and Dysfunction (Including Subluxation) After Stroke**
- **Hemiplegia**
- **Spinal Disc Herniation in the Cervical Spine**
- **Injuries of the Brachial Plexus**
- **Peripheral Nerve Damage**

Ordering Info for DME Consult:

This is an order for an Omo Neurexa Shoulder Stabilizer or Alternative/Comparable Shoulder Brace L3670 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY® X-ACT ROM ELBOW

A versatile, easy to apply, comfortable telescoping brace, allowing for ideal fixed or protected range of motion to help improve patient outcomes following surgery or injury. The easy shape-to-fit malleable forearm and bicep cuffs contour to the anatomy for a custom fit. Push thermoformed pads with unique anti-migration material maximize comfort for long-term wear and improved patient compliance. All four cuffs telefit to size for a more precise fit on any size patient. Snap-to-fit buckles allow for

Indications

- **Post-Op**
- **Stable Fractures**
- **Bicep Repair**
- **Mild/Severe Soft Tissue Injuries**

Ordering Info for DME Consult:

This is an order for a DJO X-ACT ROM Elbow or Alternative/Comparable Elbow Brace L3761-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

PROCARE QUICK-FIT WRIST BRACE

Single-pull lace closure design and the adjustable, malleable dorsal stay pod provide variability and a contoured, custom fit to accommodate the changing wrist anatomy during rehabilitation, post-trauma, or injury.

Indications

- Carpal Tunnel
- Sprains/Strains
- Tendonitis

Ordering Info for DME Consult:

This is an order for a Quick Fit Wrist or Alternative/Comparable Wrist Brace L3908-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

PROCARE QUICK-FIT WTO BRACE

Lightweight nylon/foam laminate with adjustable dorsal pod to accommodate various size patients. Pre-contoured aluminum palmar and thumb stays may be adjusted for proper angulation to address wrist and thumb pathologies. Elastic straps with D-ring closure provide compressive support and maximum patient comfort.

Indications

- DeQuervain's Syndrome
- Tendonitis
- Gamekeeper's Thumb
- Sprains/Strains
- Scaphoid Injuries

Ordering Info for DME Consult:

This is an order for a Quick Fit WTO or Alternative/Comparable WTO Brace L3809-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

ASPEN HINGED WRIST BRACE

The ideal product for patients suffering from a wrist injury. The universal design allows for either right or left wrist application and the easy closure system makes it easy to don and doff. The aluminum frame can be customized to the patient's forearm, wrist and hand for a secure fit. The Aspen Hinged Wrist can be applied in either flexion or extension control to appropriately treat multiple conditions.

Indications

- Carpal Tunnel Syndrome
- Wrist Injuries
- Muscle Strains or Sprains
- Postoperative Utilization
- Rheumatoid Arthritis

Ordering Info for DME Consult:

This is an order for a Aspen Hinged Wrist or Alternative/Comparable Wrist Brace L3916-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY® VELOCITY

Utilizing several new, proprietary design features, resulting in a new level of ankle brace performance and providing the foundation for successful ankle injury prevention and treatment. R3 (Rapid-Rigid-Ratcheted) Technology™ provides circumferential tibia/fibula compression, prevents abnormal inversion and eversion, rigid uprights protect during impact & foot and ankle speed wrap to apply compression for acute ankle injuries and to control inflammation.

*When ordering please verify type of support: Extra Support, Moderate Support, or Light Support.

Indications

- Ankle Sprains & Strains
- Instability
- Edema

Ordering Info for DME Consult:

This is an order for a DJO Velocity Ankle or Alternative/Comparable Ankle Brace L1906-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY® PRO ANKLE

Designed to meet the needs of demanding athletes. It features 800D ballistic nylon and reinforced eyelet area for outstanding performance and durability. Provides tibia/fibula compression and stability. Lace-up design and trimmable figure-8 strapping locks the calcaneus into place and controls inversion/eversion. Helps guard against ankle sprains and prevent rollover.

Indications

- Ankle Sprains & Strains
- Instability
- Edema

Ordering Info for DME Consult:

This is an order for a DJO Pro Ankle or Alternative/Comparable Ankle Brace L1902-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

ARYSE iFAST

Developed with the body in mind, the iFAST is the only dynamic ankle stabilizer. Tension systems allow for customizable support, behaving like synthetic ligaments. Upper and lower cuffs secure the device to the ankle. The built-in compression sleeve surrounds the ankle joint, keeping it warm and mobile. Fits easily inside the military boot in addition to working with any other training shoe, providing ankle protection without compromising performance.

Indications

- Ankle Sprains
- Instability
- Ankle Weakness
- Prophylactic Use

Ordering Info for DME Consult:

This is an order for an Aryse iFast Ankle or Alternative/Comparable Ankle Brace L1902-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

AIRSELECT WALKING BOOT

Comfortable moderate support and compression with the most advanced pneumatic walking boot available. Offers superior comfort and faster healing. A sleek, durable, semi-rigid shell helps support and protect the limb, while two adjustable distal aircells provide compression; patients can easily adjust aircell pressure themselves with the integrated inflation system. The boot's lightweight, lab-tested rocker sole encourages a natural gait and supports everyday activities; SoftStrike technology absorbs and dissipates shock.

Indications

- Stable Lower Leg, Foot, and Ankle Fractures
- Severe Sprains
- Soft Tissue Injuries
- Post-Op
- Post-Cast Removal

Ordering Info for DME Consult:

This is an order for a DJO Walking Boot or Alternative/Comparable Boot L4361-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DORSAL NIGHT SPLINT

Treat plantar fasciitis with tailored dorsiflexion, an anatomically designed forefoot pad and a thermoformed liner for pain relief and maximum comfort. Customize the stretch with the dorsiflexion adjustment strap; optional toe assist strap included to secure toes within the forefoot area. Easily apply with anterior shell design and flexible hinge.

Indications

- Plantar Fasciitis
- Achilles Tendonitis

Ordering Info for DME Consult:

This is an order for a DJO Dorsal Night Splint or Alternative/Comparable Night Splint L4397-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

XTERN AFO

XTERN AFO

Provides dynamic rebound for dorsiflexion and does not limit plantar flexion (plantar stop optional). Exoskeleton design fits onto the outside of the shoe, no skin contact with foot or ankle. Easily conforms to uneven ground and slopes and highly durable thermoplastic (2 year warranty) Heat adjustable (to change width and dorsiflexion strength). Easily transferable from shoe to shoe. Symmetrical design, fits both right & left foot. Easily positioned to invert or evert the foot if required.

Indications

- Drop Foot & Dorsiflexion Weakness
- Peroneal Nerve Injury
- Charcot Marie Tooth (CMT)
- Stroke (CVA)
- Multiple Sclerosis (MS)
- Cerebral Palsy (CP)
- Guillain-Barre Syndrome (GBS)
- Motor Neuropathy
- Motor Neuron Disease (MND)

Ordering Info for DME Consult:

This is an order for Xtern AFO for foot drop for purchase code L1951 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171).

Size to be determined by specialist.

*Optional Ankle Stabilization Strap

Please add ankle stabilization strap L2270 for varus/valgus correction.

★ LOWER EXTREMITY-FOOT/ANKLE ★

ASPEN M2 Anterior AFO

The M2 AFO has proven to be durable for extended use to facilitate a normal gait. The lightweight and comfortable design offers ideal support with optimal flex for toeoff. Carbon fiber construction creates dynamic forces for comfortable walking. The trimmable footplate can be customized to fit most patient shoes. Diamond stitched fabric provides comfort for all day wear.

Indications

- **Foot Drop Secondary to Neurologic Conditions Such As:**
 - **Stroke**
 - **Multiple Sclerosis**
 - **Trauma/Injury**

Ordering Info for DME Consult:

This is an order for an Aspen M2 Anterior AFO L1932-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

ASPEN M2 Posterior AFO

The M2 AFO has proven to be durable for extended use to facilitate a normal gait. The lightweight and comfortable design offers ideal support with optimal flex for toeoff. Carbon fiber construction creates dynamic forces for comfortable walking. The trimmable footplate can be customized to fit most patient shoes. Diamond stitched fabric provides comfort for all day wear.

Indications

- **Foot Drop Secondary to Neurologic Conditions Such As:**
 - **Stroke**
 - **Multiple Sclerosis**
 - **Trauma/Injury**

Ordering Info for DME Consult:

This is an order for an Aspen M2 Posterior AFO L1951-1 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY DEFIANCE III®

Extreme sports. Water sports. Contact and non-contact sports. The Defiance III is Donjoy's flagship custom knee ligament brace, offering a perfect custom-made fit for every athlete. For weekend warriors to elite athletes.

***Must have specific diagnosis when ordering this custom brace. Dx provided can not be a generic symptomatic dx. (i.e. not covered for unspecified and/or general knee pain.)**

Indications

- Hyperextension
- ACL/PCL Instabilities & Reconstructions
- MCL/LCL Instabilities
- Prophylactic use
- Ligament Sprains
- Knee Derangement

Ordering Info for DME Consult:

This is an order for a DJO Defiance III Knee Brace L1846, L2820, L2830, L2755, L2397 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY ARMOR KNEE BRACE

Fits patients profile. The steel reinforced hinge plate delivers additional strength while the low profile ForcePoint hinge and internally mounted straps promotes bilateral use that won't impede performance.

Indications

- Hyperextension
- ACL instabilities
- Prophylactic/bilateral use
- ACL/MCL/LCL instabilities
- ACL Reconstructions

Ordering Info for DME Consult:

This is an order for a DJO Armor or Alternative/Comparable Knee Brace L1852 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY OA NANO KNEE BRACE

Functional comfort in a lightweight design. The flexibility of the magnesium frame allows for an intimate fit while the revolutionary nano MAG material provides strength to off-load and provide pain relief. Designed for people to stay active and move freely.

Indications

- Mild/Severe unicompartamental OA
- Knee Conditions requiring Load Reduction
- Articular Cartilage defect
- Tibial Plateau Fracture
- Meniscus Repair

Ordering Info for DME Consult:

This is an order for a DJO OA Nano or Alternative/Comparable Knee Brace L1852 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

★ LOWER EXTREMITY-KNEE ★

DONJOY CLIMA-FLEX OA KNEE

New level of comfortable, cooling relief through compression and offloading for patients with mild to moderate OA knee pain. New DonJoy C-6 Fabric Technology delivers breathable, moisture-wicking comfort that's soft to the touch, antimicrobial and incorporates temperature control. Keyless offloading enables on-the-fly hinge adjustment to empower patients with convenient, comforting relief from OA knee pain. E-Z Grip handles and intuitive wraparound design ensure form-fitting comfort. The brace is easily adjustable for more or less compression based on patient needs and comfort.

Indications

- Mild/Severe unicompartmental OA
- ACL injuries

Ordering Info for DME Consult:

This is an order for a DJO Clima-Flex OA or Alternative/Comparable Knee Brace L1851 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY PLAYMAKER®

Premier soft ligament knee brace. Recommended for non-contact sports and activities of daily living. Suitable for mild to moderate ligament instabilities. Ideal intermediate-level product for sporting activities.

Indications

- Hyperextension
- Flexion Control
- Post-Op
- Prophylactic/Bilateral use
- MCL/LCL Instabilities
- ACL Reconstructions

Ordering Info for DME Consult:

This is an order for a DJO Playmaker or Alternative/Comparable Knee Brace L1833 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY X-ACT ROM KNEE

Quick and easy to apply, allowing efficient use of time. The anti-migration foam and dynamic suspension frame naturally contour this lightweight brace to the patient's leg, providing a precise fit after surgery. Designed to provide precise protection and support post-operatively for patients following knee procedures.

Indications

- ROM Control Following ACL, PCL, MCL and LCL Surgeries
- Meniscal Repairs
- Patella Realignment
- Regenerative Chondroplasty
- Stable Femoral Fractures
- Total Knee Replacements

Ordering Info for DME Consult:

This is an order for a DJO X-ACT ROM or Alternative/Comparable Knee Brace L1833 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

ASPEN OA KNEE

Designed to decrease knee pain and inflammation associated with Osteoarthritis, the OA Knee Wrap fits comfortably and securely to allow patients to return to a more active lifestyle. The dual hinge feature ensures even pressure distribution and allows for flexion/extension stops. The Aspen OA Knee wrap can be quickly donned and doffed as needed by the patient.

Indications

- Mild/Severe unicompartamental OA

Ordering Info for DME Consult:

This is an order for a Aspen OA Knee or Alternative/Comparable Knee Brace L1851 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

ASPEN OA KNEE+

Premium single upright off-loading brace is ideal for patients with mild to moderate osteoarthritis. The low profile, universal design with two-point hinge adjustment offers even pressure distribution.

Indications

- Mild/Severe OA
- Load Reduction

Ordering Info for DME Consult:

This is an order for a Aspen OA Knee+ or Alternative/Comparable Knee Brace L1851 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

*Aspen Knee Suspension Wrap can be used in conjunction with the above Aspen OA Knee+ for patients needing additional support.

Include **HCPCS L2397** with ordering info above in referral.

The Aspen Knee Suspension Wrap helps prevent the brace from migrating on patients and can help prevent skin irritation.

DONJOY TRU PULL LITE™

For acute mild to moderate lateral patellar subluxation or dislocation and maltracking. The bifurcated strap dynamically pulls the patella into proper alignment. A Dual Durometer Buttress System interfaces directly with the patella, applying a consistent corrective force. Independent anchors at the thigh and calf prevent rotation of the brace and an anti-microbial-treated, wicking fabric is breathable and lightweight- thereby increasing patient comfort. Set of removable plastic hinges included with every brace to provide medial and lateral stability.

Indications

- Chondromalacia with Instabilities
- Knee Pain

Ordering Info for DME Consult:

This is an order for a DJO Tru Pull Lite or Alternative/Comparable Knee Brace L1812 and L2795 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY REACTION WEB

A responsive, webbed approach to knee pain that gives you a distinct alternative to the basic knee sleeve. The elastomeric web absorbs shock, disperses energy and shifts pain away from your knee. This comfortable, easy to apply solution takes the shape of your knee, with a design engineered for better fit and comfort.

Indications

- Chondromalacia with Instabilities
- Patellar Tendonitis
- Knee Pain

Ordering Info for DME Consult:

This is an order for a DJO Reaction or Alternative/Comparable Knee Brace L1812 and L2795 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

Pneumatic Knee w/ROM Hinge

Features R.O.M. hinges that allow for full flexion and extension control and wrap-around design for ease of application; available in two lengths.

Indicated for medial/lateral instability, muscle/ligament weakness or injury, and degenerative joint disease where extension/flexion control is required. Manufactured from premium grade latex-free neoprene.

Indications

- Medial/Lateral Instability
- Muscle/Ligament Weakness
- Knee Pain
- Injury
- Degenerative Joint Disease

Ordering Info for DME Consult:

This is an order for a Corflex Pneumatic ROM Knee or Alternative/Comparable Knee Brace L1833 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

DONJOY ECO HINGED

Cool and breathable Drytex® construction Sleeve or wraparound styles for optimal fit and comfort. Encased hinges with aluminum uprights can be removed to wash soft goods. Popliteal cutout for improved fit and comfort.

Indications

- Chondromalacia with Instabilities
- Patellar Tendonitis
- Edema Control

Ordering Info for DME Consult:

This is an order for a DJO ECO Hinged Knee or Alternative/Comparable Knee Brace L1820 as listed from Tactical Rehabilitation (Fed Tax ID 46-2082171)

A Heart for Serving Others

AWARD WINNING

**TRAINED
AND
CERTIFIED**

Tactical Rehabilitation was recently recognized by the U.S. Department of Labor and received the 2023 Platinum HIRE Vets Medallion Award.

The HIRE Vets Medallion Program is the only federal veterans' employment program that recognizes commitment to veteran hiring, retention, and professional development. We're proud to be a recipient of this award and to support veterans and their career goals.

Join us in celebrating our recognition in the USA TODAY Veterans Affairs Special Edition.

Check out the digital version of the publication here

It's an honor to be acknowledged for our commitment to veterans and the exceptional services we provide. We're excited to share this milestone with you.
